

PRESENTATION

The company Logística Friseco S.L. has been created to give a response to the latest needs of the current and future refrigerated and frozen distribution, storage and transport sectors. Our mission is to maintain the highest, safest quality of frozen food products during their transfer stages

Our facilities have been designed to offer the most demanded services of our sector, such as:

- Storage
- Cross-docking
- Picking
- Distribution
- Freezing tunnel (-40°C)

Therefore, Friseco is equipped with seven walk-in freezers, which can work in positive or negative cold, depending on the needs. We also offer a freezing tunnel that can contain 40 pallets, 30000 kg, and works at -40°C.

In our cold storage units, we have advance storage systems, such as Pushback (a gravity moving rack system), Movirack (a high density mobile racking system) for storing and Picking, and compact and reinforced racks

like the drive-in racking system, designed to obtain a huge volume of storage.

We offer 12 docks and a controlled temperature wide loading/unloading area.

Our shifts and schedules are adapted to our customers' needs.

Logística Friseco relies on a highly qualified staff, experienced in the Picking service in different sectors. They are able to use the latest technologies and IT systems (including Radio Frequency), of our own or of a third party, which are specific to this kind of service.

At Friseco we are conscious of the importance of the quality of the service. For that reason, we have taken into account our customer experiences in

both the design of the facilities and its installation. Thanks to all that experience we could avoid most of the issues you could face, and find solutions to them, being even able to foresee them.

Our strength is based on a very fluent communication with our customer, which constantly adapts and improves our service. Our goal is to offer an easy and practical system to our customers that will allow them to concentrate their efforts on their own business.

We also offer the possibility to rent offices in our facilities, from 16 sqm to 40 sqm, with shared areas, like meeting rooms, dining rooms, toilets, etc.

Our facilities are ready to be extended in case that would be necessary.

BENEFITS OF WORKING WITH FRISECO

We want to be your cold storage partner. For this, we offer all the services required to make you feel like we are one of your own business departments. Our goal is to avoid you any issue and make your work easier. You just have to give us your instructions and our staff will handle them. Our response times are very short to make the freight as fast as possible.

Our geographic location is exceptional thanks to all the connexions to the whole South-East area of Spain. We are located in the A-7/E-15 motorway exit 523 (Elche-Crevillente). This is very close to the coast line motorway AP-7 (Torrevieja, San Pedro Del Pinatar, San Javier, La Manga del Mar Menor, etc.), and also close to the A-31, Madrid freeway junction (Elda, Novelda, Villena, Almansa, etc.), to the inland A-7 (Ibi, Alcoy, etc.) and of course, close to Murcia and Alicante.

Como llegar

The demography of the close area allows to reach around 2 million resident people, and more than 3 million touristic floating population. This population is distributed in different routes so Friseco allows to unite platforms and an economic saving in logistics.
